

PUTTING AFRICA ON THE MAP
ramani

The Ramani Story

Ramani was founded in 1999 and is now the leading geospatial company in East Africa. From our Nairobi headquarters, we operate in over 10 countries in the region, providing cutting-edge survey and mapping solutions to the private sector, Governmental and non-Governmental organizations. Ramani has a great team of surveyors, GIS specialists, photogrammetrists and support staff, all working together to provide the client with an exceptional experience.

Ramani's operations are separated into two main subsidiaries – **Ramani Geosystems** and **Ramani Land Services**. Ramani Geosystems, with its experienced team and technology offers a range of airborne and space survey solutions providing complete solutions generally for larger areas. Ramani Land Services works on the ground utilizing world-class survey techniques and passionate surveyors to provide the whole range of land survey solutions.

Our Solutions

Ramani have a full range of bespoke and off-the-shelf solutions to support our clients: whether it be large-scale regional infrastructure development or small residential builds. Our solutions range from Aerial Photography and LiDAR Surveys, satellite imagery, land survey, as well as GIS & Mapping, and are tailored to meet project requirements for various applications. Ramani online services provide the web based platforms for accessing Ramani CITIData, our vast library of imagery and spatial data captured over the years for cities & towns in East Africa as well as client data when required.
