

A collection of detailed ground-level imagery taken with the XCAM G camera mounted on a moving vehicle

True 360° view

- · 3D spherical view of the ground
- Full perspective from multiple camera angles
- · Augmented reality mode

Detailed View

- · Clear vision of small objects
- · Low, medium, and high-resolution image view
- · Close visibility of objects up to 100m
- · Rich complement to aerial imagery and maps

Drive Through

- · Navigate faster and easily in 'Drive Mode'
- · Coverage of most Kenyan roads
- · Keyboard control for quick motion
- · Drive in forward or reverse

Accurate Measurement

- · Measure height, length, areas, and volumes
- · Measure exact object position and orientation
- · Improved precision with multiple camera views

Create and Edit

- · Import and visualize geotagged features
- · Synchronised edits in Map and 3D views
- · Accurate mapping of objects aided by 3D views

Accurate measurements of objects in 3D view

On demand GV360 survey:

- Private GV360 image collection for your project
- Single passage for specific or private area
- Regular surveys for work supervision or maintenance
- Upload your custom geotagged images
