

RAMANI GEOSPATIAL

*Round-the-clock geospatial data processing services
adapted for your projects*

Quick Project Turnaround

- 24-7 data processing
- Effective project workflows
- Proven delivery of projects in time
- Sufficient & relevant processing resources

Experience

- Experienced project managers
- Trained geospatial technicians
- Ability to handle projects of different sizes
- High accuracy mapping

Diverse Capabilities

- Mapping technicians with diverse skills
- Capacity to handle different datasets
- Ability to handle large datasets
- Exposure to various software & hardware

Team Synergy

- Different teams but seamless and consistent output
- Established team management system
- Team guided by defined mapping standards

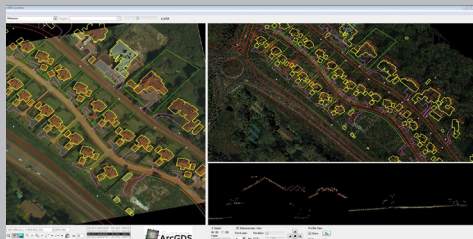

Customised Mapping For You

2D Mapping

XY mapping using the latest ArcGIS software

3D Mapping

XYZ mapping using the latest Leica ArcGDS software

DTM Editing

DTM Editing using DTMaster

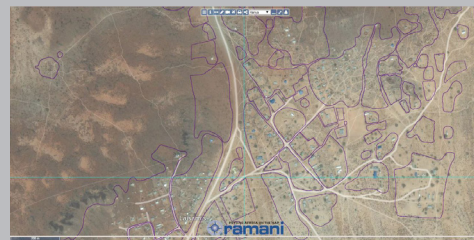

LiDAR Classification

Classification of LiDAR point clouds in Terrasolid

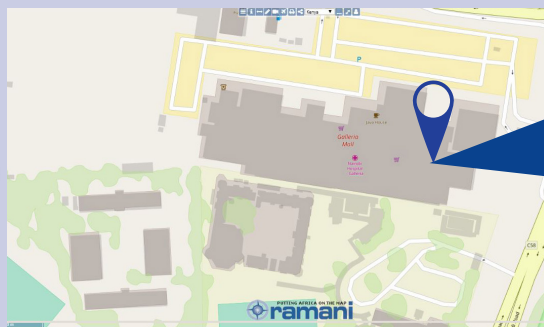

Cadastral Mapping

Digitization of cadastral plans and 2D mapping of other ground features

Data Mining

Analysis of large datasets to generate new information

Enrich your maps with Points of Interest collected using hand-held mapping devices by Ramani
